**Case Book for MS (Dental Surgery) Part II**  
**MS (Dental Surgery) - 1991**

**D 94**

This case book is a reflection of some of the clinical and academic experience achieved in a four year period of postgraduate training in dental surgery. The latter part of the book ( case number 26-40 ) represents the clinical training and experience gained in the United Kingdom. The cases presented are more inclined towards oral surgery, oral medicine and oral pathology as the author worked most of the time in oral and maxillofacial surgery units.
