

2050. Warusavithana, S.D.P

Evaluation of care seekers attending the antenatal clinic at General Hospital, Anuradhapura.

MSc.(Community Medicine) - 1994

D 259

The objective of the study was to evaluate the care seekers attending the ANC at G.H. Anuradhapura and to identify the factors affecting the effective use of this centre as a referral clinic. The study was conducted from 27 th June to 22 nd July 1994. The main study was carried out at the ANC in G.H. Anuradhapura. A part of the study was carried out in selected ANC at PHC level to identify the factors at PHC level which will strengthen the ANC at G.H. Anuradhapura as a referral clinic.
