7.0 Conclusion

1. "Parinama sula and Annadrava sula" well correlate with peptic ulcer disease.
2. "Parinama sula and Annadrava sula" both possess almost same pathogenesis according to Ayurvedic view point.
3. Vishnukranti has a very significant effect on "Parinama sula and Annadrava sula"
4. Vishnukranti possesses significant ulcer healing property in human models.
5. Vishnukranti possess significant gastroprotective action which in tern helps in healing of ulcers.
6. Vishnukranti Kalka has equal effect on "Parinama sula and Annadrava sula" comparatively but Vishnukranti Kalka has shown its gastroprotective action higher than Vishnukranti Powder.
7. Toxicity study revealed that Vishnukranti has no toxic effect on animal models.
8. Vishnukranti Powder reduces blood glucose level and triglyceride level in animal models. Therefore Vishnukranti can be used as an herbal drug for peptic ulcer patients who suffer from diabetes and hyperlipidaemia.
9. Anti oxidant activity of Vishnukranti helps to cure the ulcers and reduces the tissue damage and carcinoma.
10. Vishnukranti has bactericidal activity which helps to heal ulcers.
