

## Abstract:

**Objective:** The objective of this study was to improve student effectiveness in laboratory using instant lab report.

**Method :** First we introduce the instant lab report method for our student. After introducing this method we did the formative assessment of laboratory and analyze the average mark with previous assessment average mark.

**Result :** When we analyze the formative assessment of student after apply our learning agreement on instant lab report we found average mark of the student was higher than the earlier assessment. We observe 21% increase above 50 mark range in their mark and average student mark above 60 mark range was significantly increase after introducing instant lab report.

**Conclusion:** Therefore we can conclude that instant lab report method is suitable for up-regulate the student effectiveness in laboratory.

**Key word :** instant lab report, formative assessment, laboratory, learning agreement
