

TERRAIN ANALYSIS USING THE AERIAL PHOTO-  
INTERPRETATION TECHNIQUE - A CASE STUDY

OF THE AREA AROUND VALACHCHENAI  
SRI LANKA

By

W.N. WILSON

Dissertation

ACKNOWLEDGEMENT	
LIST OF MAPS	i
LIST OF FIGURES	ii
LIST OF TABLES	iii
INTRODUCTION	1
CHAPTER I : METHODOLOGY	8
I. Preliminary aerial photo interpretation	8
II. Field work	12
III. Post field work procedures	13
CHAPTER II : BACKGROUND INFORMATION : GEOMORPHOLOGICAL FACTORS AND THEIR EFFECTS	14
I. Major factors	18
i. Physiographic	18
ii. Oceanographic	34
II. Secondary factors	37
i. Physiographic	37
ii. Biotic	38
iii. Atmospheric	40
iv. Human	47

	<u>Page</u>
CHAPTER III : GEOMORPHOLOGICAL UNITS	51
I. Denudational units	52
II. Fluvial units	57
III. Coastal units	65
CHAPTER IV : SOME DISTINCTIVE GENETIC ASPECTS OF TERRAIN UNITS IN VALACHCHENAI AREA	80
I. Shoreline development	80
II. Chrono-sequence of the beach ridges	82
III. Coral reef	83
IV. Growth of the delta	85
V. Sandy nature of lagoon deposits	87
VI. Soil development of the area	89
CHAPTER V : GRAIN-SIZE ANALYSIS	94
I. Sampling technique	94
II. Laboratory analysis	97
III. Statistical analysis	101
IV. Interrelationships among parameters	138
V. Comparison of terrain units	175
CHAPTER VI : CONCLUSION	179
BIBLIOGRAPHY	185
APPENDIX - I	
APPENDIX - II
